PROJECT TITLE

Mini To_Do List

AGENDA

1. Problem Statement
2. Project Overview
3. End Users
4. Tools and Technologies
5. Portfolio design and Layout
6. Features and Functionality
7. Results and Screenshots
8. Conclusion
9. Github Link

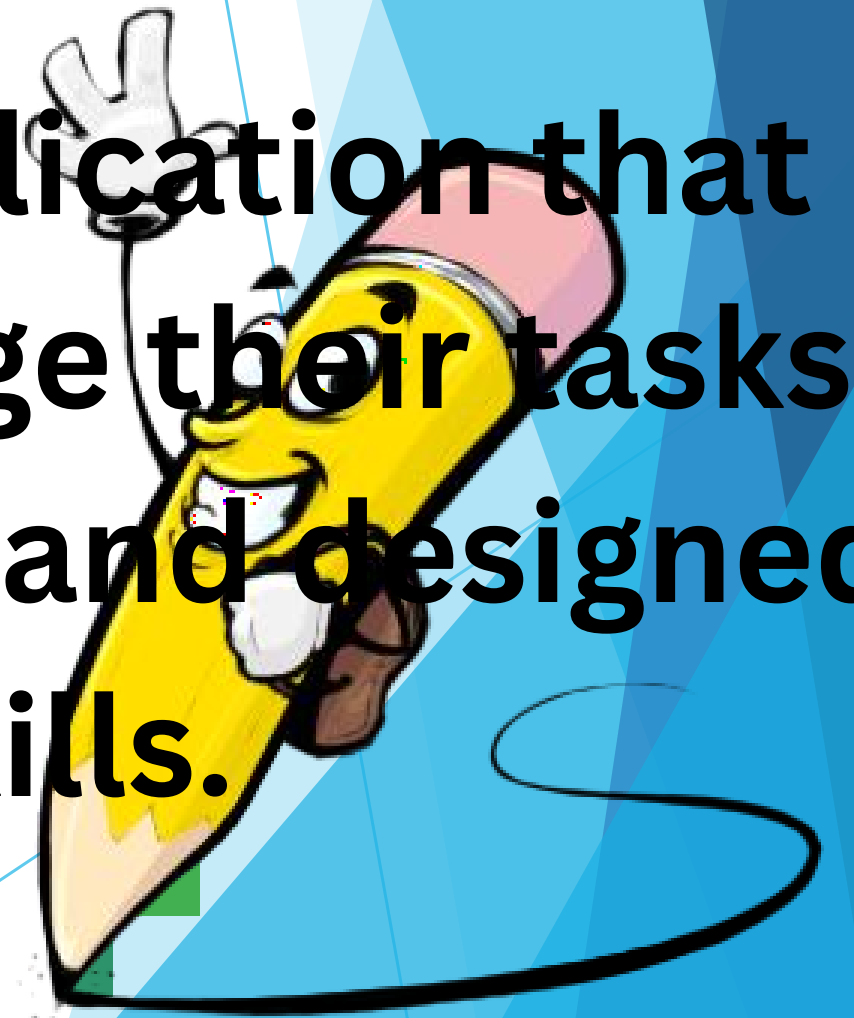

PROBLEM STATEMENT

Managing daily tasks is often challenging without an organized system. People tend to forget important activities, leading to missed deadlines and reduced productivity. A digital to-do list helps keep tasks structured, accessible, and easy to update.

PROJECT OVERVIEW

This project is a Mini To-Do List Web Application that allows users to create, update, and manage their tasks effectively. It is lightweight, user-friendly, and designed to improve time management skills.

WHO ARE THE END USERS?

Students – for tracking assignments and study schedules.

Employees – for managing work tasks and deadlines.

General users – for personal task tracking and reminders.

TOOLS AND TECHNIQUES

Frontend: HTML, CSS, JavaScript

Version Control: Git, GitHub

Editor: VS Code

(Optional): LocalStorage for saving tasks

POTFOLIO DESIGN AND LAYOUT

Simple & clean UI with a minimalistic design.

Task input box at the top.

Task list section below with checkboxes.

Add / Delete / Mark as Done options.

Responsive layout for desktop and mobile.

FEATURES AND FUNCTIONALITY

Add new tasks.

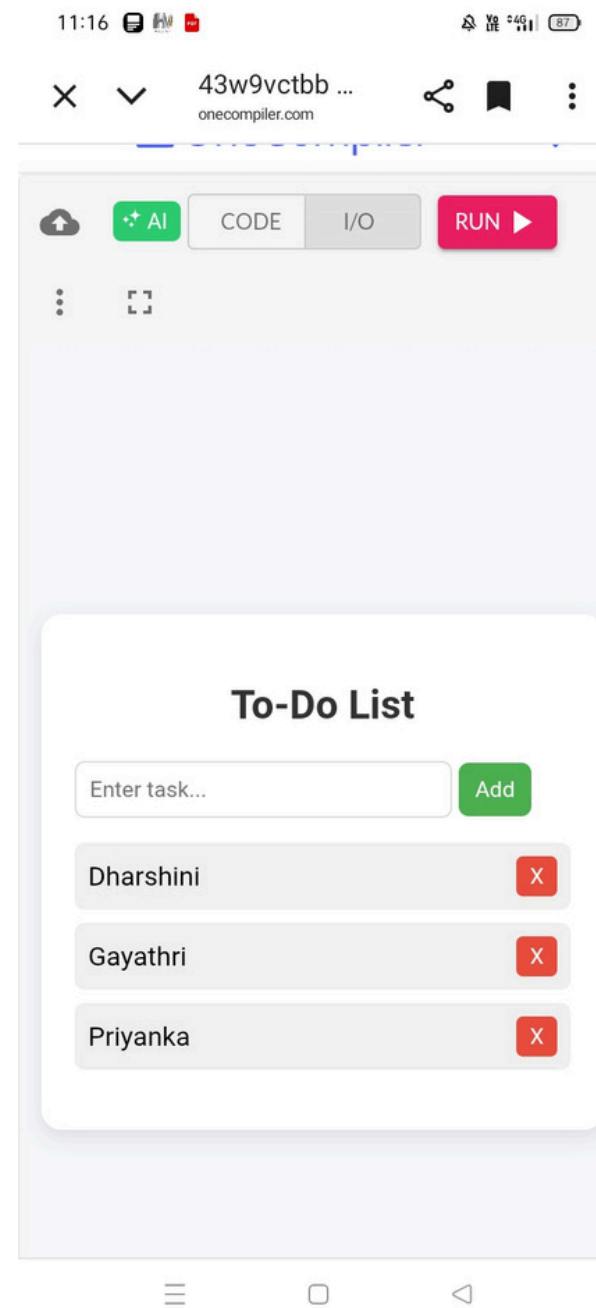

Mark tasks as complete/incomplete.

Delete tasks.

Persistent storage (LocalStorage).

User-friendly interface.

RESULTS AND SCREENSHOTS

CONCLUSION

Add new tasks.

Mark tasks as complete/incomplete.

Delete tasks.

Persistent storage (LocalStorage).

User-friendly interface.
